angry ball vr

Boring gameplay with not much to do.. Pretty fun 3rd generation fighter, despite not being as capable as many other planes in this game. I mainly like to fly this for bombing and strike missions, but with some practice you can also fly this plane like an air dominance fighter. This plane is especially fun in low level, high speed flying inn VR. This plane is fairly simple due to the fact that it is so old, and so the learning curve is pretty small compared to other planes in DCS.. SPent a dollar on this and I feel robbed.. Beautiful puzzle game with some fun stuff to unlock like seasonal backgrounds and sprite customizations. Completing a level may not seem too difficult until you try for those 3 star ratings. A nice challenge and fun to play. I got this one on sale but it's definitely worth the regular price of \$4.99.. Just a piece of crap... don't buy it. Great game, Developers still putting effort into making it better. Fun puzzle game, powers make it interesting. Easy to get started, hard to master. Makes you think a bit when you get near the end. I will probably put another 20 hours in later on, lots of other games to play for now.

My rating 8/10 - AKA great game for price.

If you're going to buy this game ,
mean you don't need good translation ,or story.

You need just the Art to fulfill your Bushido spirit.

Patch the game for better experience.. Blanco (Or At Least What I Have Played Of It So far)
Is a fantastic game That I wish I had found sooner

Of Course It Is still early access so a few bugs are present (You Can Get As Many Cards you Want In any level if you keep coming back to it) But Other Than That It Really Is a fun Game If You like 3D platformers like super mario 64 and the like.

but it is not just the gameplay oh No This game also has a Great Soundtrack. I would say all the music I have heard so far is either amazing or incredible (The Exception being the clocktower level which I feel was lacking With Its music)

And The "Story" Is Good For What It Is, Your A cube person and all the other cube people go on adventures to find their colour, And While Its Decided For most by their name (Someone named blue tries to find blue Someone Named red Etc) Your father/Caretaker/TophatGuy Decideds to name you blanco, so you can decided what colour you want.

So Blanco Teleports to a forest circle and begins his amazing adventure to find his Colour Which I guess is the color Blanco Which When I googled it seems to be white with a tad bit of gray.

The Game Also Has a shop but for now its semi barebones and also a card system where you collect cards and unlock stuff with em

Also It Had some challenge to it as some of the platforming can be difficult (Personally I thought the enemies were pretty easy to mess with except for the red bug guys)

All In All its a fantastic game so far And With its current price (3.29 But I got it on sale) How Can you not want blanco?
Of Course You Could not want blanco Or You Could leave a 5 dollar bill on the ground in a forest becuase those are on the same level.

Personally Though I really Like games like this where even though it seems hardly anyone knows about it, in reality its a fantastic game (Games Like David,Dark ball 2 Karma) And I have to praise the maker And give him the best of luck to make blanco even better then it already Is!. Let's be clear here: This game only costs 2 bucks. When it's not on sale. You can hardly ♥♥♥♥ up so hard that it won't be worth those 2 bucks. For me, it was worth about 7 hours of puzzling.

The game consists of 5 "worlds" with 25 levels each. Every world introduces new and different gimmicks, from speeding trains to waterfalls to machine guns to self driving lorry carts, elevators, etc. etc. Your goal each time is to blow up the big green safe and optionally the three piggy banks (and if you can and want the hidden object). Unfortunately, this being a mobile port, you need to destroy quite a few of those piggy banks to unlock later worlds, which is funny, because within each world every level is immediately available. To do so you have to generally blow up barrels and connect them with blackpowder lines. This is all pretty fun and stuff, IF NOT for the infuriating design decision to include timed "drag" levels. What I mean by that is that there are quite a few levels in the game in which you have to blow up an obstacle, ignite a fuse and "drag" it around the screen until the obstacle is gone and you can continue to the next obstacle. If you expect just a slow and peaceful puzzler, let this one go, as things can get quite hectic, especially later on, when you also have to manipulate the machinery and more in the levels. For example: In later levels it is crucial to change the direction of train tracks many different times while there is an on fire mine cart on its way. This can get very stressful.

If you can deal with that, however, you have yourself a nifty little "action puzzler" with ok graphics, ok music, incredibly annoying sound effects and the inclusion of a "story" for whatever reason. The 10 comic book style panels are just kind of unnecessary and don't even convey any meaningful information.

After you've destroyed enough piggy banks you can also unlock the "hidden levels", which is just another chapter of 25 that were supposedly scrapped from the game at some point? Dunno. The game teases you with "more levels soon" after that, but seeing as the last update on Steam was in 2015 I highly doubt that..

It's pretty clear the designers had the idea in mind to create a game like the old Mega Man X carts on super nes; with the bar set high for player skill and pattern learning. Only problem is, is that those old Mega Man X games had PRECISE controls and excellently laid out level designs. This game has neither. I want to recommend it, I really really do, but I just can't. The game plays like a flash game with upgraded graphics, nothing more.. A decent little turn-based strategy war game.

Gameplay is an army vs army border shoving match. Players stack units on friendly tiles, then clash with opponents' stacks on adjacent tiles. Higher stack number overtakes lower stack number, and the player is left with the difference on the newly occupied tile. The number of armies you can place each turn depends on the health of your economy, as managed by allocating resources to tiles with cities on them. You can place up to 3 armies per friendly tile per turn, and move them one space to an adjacent tile. Win by controlling all the tiles on the map.

The menus aren't very intuitive, but there's only a few buttons and you can figure out what they do within the first couple of turns. Also, to play again you have to exit and restart the game as far as I know.

I visited the Reddit page where there are some contrib maps, and they do work well with a simple copy-paste of some txt. The game locked up a bit when loading a bigger map but eventually came through just fine.

Overall I'm very satisfied with my purchase and I think the game will have good replay value.
